

# Coming Soon: Roundabouts in Henderson

Six new roundabouts are being built in Henderson. Three roundabouts will be located at the reconstructed KY 351/2nd Street interchange and three will be located at the new US 60 interchange.

## Roundabouts at KY 351/2<sup>nd</sup> Street

The roundabouts at KY 351/2nd Street will facilitate moving traffic on and off I-69 and east and west along KY 351/2nd Street.

The western roundabout connects drivers to North Middle School, KY 2084 and KY 351/2nd Street.

Two roundabouts to the east work together to provide access on and off I-69 and connect KY 351/2nd Street and Zion Road.

## Coming in Late 2025: Roundabouts at US 60

Three roundabouts at the new US 60 interchange will facilitate moving traffic on and off I-69 and east and west along US 60.

The eastern roundabout will connect Tillman Bethel Road with US 60.

Two roundabouts to the west will work together to provide access off and on I-69 and carry traffic east and west along US 60. This is another “dogbone” roundabout.

The three roundabouts are expected to open to traffic in late 2025.

## Dogbone Roundabouts

- A dogbone roundabout includes two roundabouts connected by parallel traffic lanes.
- Dogbone roundabouts are often used where a highway intersects with a smaller street.
- They greatly improve safety by slowing and separating traffic.
